Subject: A local, custom solution for your patients' severe dry mouth (Xerostomia)

You likely see patients every week struggling with severe dry mouth—whether it's medication-induced, post-radiation, or from Sjögren's syndrome. When over-the-counter rinses aren't enough, we wanted to make sure you knew about a highly effective option we provide right here in Omaha.

At J Kohll RX Compounding, we specialize in custom Pilocarpine Troches to help patients reliably produce saliva and protect their dental health.

Here is why many local providers prefer compounding Pilocarpine into a troche:

- Targeted, Faster Relief: Dissolving the troche in the mouth provides direct, localized stimulation to the salivary glands.
- Custom Dosing: We can fine-tune the exact strength to maximize saliva production while minimizing common systemic side effects (like excessive sweating or nausea) often seen with standard oral pills.
- Better Compliance: They are easy for patients to take and can be flavored for comfort.

We would love to be a local resource for your practice and your patients. Would you be open to me dropping off some quick information and a custom prescription pad at your office next week?

Best regards,
